

RADIUS DATA CENTRE & COMMERCIAL SERVICES

# RADIUS DATA CENTRE SERVICES

*“Radius Data Centre Services converts your business needs into strategic requirements to assist you in the designing, relocating, constructing or reshaping of your data centre.”*

The underlying demand for any data centre facility is the ability to provide an environment that supports business continuity. Businesses rely on their information systems to run their critical operations. If a system or application becomes unavailable, a company's operations may be impaired or stopped completely. So it is necessary to provide reliable infrastructure in order to minimize any chance of disruption to your critical business operations.

Data centres also have to offer a secure environment which minimises the chances of any potential security breach or unplanned outage, and must therefore keep the highest achievable standards for assuring the integrity and functionality of its hosted computer environment.

Radius Data Centre Services provides expertise in the following areas:

## Data centre consultancy

- Capacity planning and modelling

# RADIUS COMMERCIAL SERVICES

***“Radius Commercial Services specialises in fit outs and refurbishment projects for commercial office interiors, that are delivered on time and within budget.”***

Changes within business often predicate the need for additional space or for the existing space to be redesigned in order to compliment the changed needs. Radius Commercial Services is an expert on advising clients on how best to make the most of your existing environment and to create a floor plan that encapsulates efficiency and promotes a great working atmosphere.

Radius Commercial Services offers a complete fit out solution right down to minor internal alterations for commercial and corporate spaces large or small. Radius Commercial Services create fit outs that are both contemporary and stylish and that above all are functional. So whether you are fitting out new premises or just require the space you have to do more, we have the design and project management experience, along with the suppliers and qualified contractors, to provide a superior result.

Radius Commercial Services can project manage your entire commercial and office fit out, commencing with the floor plan design right through to the build completion. Our full turnkey service means that everything is integrated, seamless and simple. Radius Commercial Services does not leave you powerless, rather we aim to empower our clients providing expert advice and open communication throughout the design and construction phases. We work together with our clients for the best results.
